1 Introduction

1.1 Purpose

The purpose of this document is to capture and record a description of what the Users and Business Stakeholders of the project wish to obtain, by providing high-level business requirements. This document establishes the basis for the agreement between the initiators and implementers of the project. The information in this document serves as input to determine the scope of projects and all Business Process Modeling and System Requirements Specifications efforts.

Business requirements are what must be delivered to provide value for the Users and Business Stakeholders. Systems, software, and processes are the ways (how) to deliver, satisfy or meet the business requirements (what).

The purpose of this project is to replace the existing Congestion Revenue Rights (CRR) application with a new application that adopts the latest technology stack that is aligned with CAISO's technology standards, consolidate all CRR related functions, minimize human errors, reduce processing time, eliminate manual workarounds, and position the system to be able to accommodate policy changes down the road.

2 Intellectual Property Ownership

Intellectual Property covers a broad array of information and materials, including written works, computer programs, software, business manuals, processes, symbols, logos and other work products. Determining ownership of Intellectual Property is very important in preserving the rights of the California ISO, and helps to avoid Intellectual Property infringement issues. In considering the business requirements or service requirements to be performed, the business owner of the project must determine Intellectual Property Ownership.

2.1 Guidelines

Intellectual Property ownership must be considered by all applicable stakeholders before the services are performed. The level of analysis is two-fold:

- One, the business owner must determine if the Intellectual Property necessary to perform the services is owned by the California ISO or whether it must be obtained from a third party. Once the California ISO has secured the proper Intellectual Property rights to perform the services (i.e., the Intellectual Property is owned by the California ISO or we have licensed it from a third party), the California ISO can undertake the next step.
- The second step in the analysis is to consider whether new Intellectual Property will be created because of the business requirements or service requirements to be performed, and how that Intellectual Property will be owned and protected by the California ISO.

In order to assist the business owner in the analysis previously described, refer to the California Intellectual Property Policy available at:

<http://www.caiso.com/rules/Pages/LegalPoliciesNotices/Default.aspx>, which provides a brief tutorial on what Intellectual Property is and how the California ISO can protect its Intellectual Property.

Contact the Legal Department if you have any questions regarding Intellectual Property.

There are no impacts to intellectual property based on the requirements stated in this document.

3 Details of Business Need/Problem

3.1 Description

Congestion Revenue Rights (CRR) system replacement project scope is the roll-out of a:

- Brand new user-interface (UI) system with an updated new look-and-feel, to replace the existing legacy system implemented during the MRTU 2008 go-live and brought up to current ISO technology standards
- Set of application-programming interfaces (APIs) to enable integration between ISO and market participant systems

Overall, to support the following in one consolidated CRR external-facing system:

- Annual/Monthly Auction and Allocation market participant bid submission and results retrieval
- Load data submission by CRR LSEs, CEC
- Load migration data submission by CRR UDCs
- Secured "Congestion Revenue Rights Full Network Model" information access
- Private and public access of CRR market input and output information

5 Business Requirements

The sections below describe the Business processes and the associated business requirements involved in the project. These may represent high-level functional, non-functional, reporting, and/or infrastructure requirements. These business requirements directly relate to the high-level scope items determined for the project.

5.1 Business Process: Manage Congestion Revenue Rights

5.1.1 Business Requirements – Posting CRR Calendar Schedule

ID#	Business Feature	Requirement Type	Potential Application(s) Impacted
CRRSU-BRQ00220	Solution shall provide the capability for authorized CRR users to post approved CRR calendar schedule to CRR participants. Note: The CRR system publishing of the calendar to OASIS shall be automatic. Published once per year and ability to edit before publication.	Core Phase 2	- CRR - OASIS - Integration

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

5.1.2 Business Requirements – Annual/Monthly CRR Allocation Process

5.1.2.1 Automatic Notification to CRR Participants of Open Load Window

ID#	Business Feature	Requirement Type	Potential Application(s) Impacted
CRRSU-BRQ01520	<p>Participants Notification of Open Load Submission Window for CRR Allocation Markets</p> <p>Solution shall have the capability to automatically and on-Demand (by authorized users) notify external CRR participants of open load submission window for each allocation market by utilizing the posted CRR calendar schedule and configurable number of lead business days.</p> <p>Note:</p> <ul style="list-style-type: none"> Refer to CRRSU-BRQ01540 for notification methods. 	Core Tariff 36.8.2	- CRR
CRRSU-BRQ01540	<p>Automatic Notification Methods for External CRR Participants:</p> <p>External CRR participants' notification provided by Solution shall meet the architecture standard for external notifications and may include any combinations of the following (as selected by authorized users):</p> <ul style="list-style-type: none"> Message Log accessible by external CRR participants via API. Message Log accessible by external CRR participants via UI. Dedicated UI. 	Core	- CRR

5.2 Business Process: Market/Business Simulation

Note: This section is not required for the RFP and initial BRS. It will be added later, once a vendor is selected.

This section shall provide a basis for the development of the Market/Business Simulation Scenarios. These requirements will provide guidance on the market participant impacts, inputs into the Scenarios, endpoints to the Scenarios and reasons for potential Scenarios. The guidance on market participant impacts shall be gathered from the requirements that impact rules, interfaces, applications/reports, new system processes, new/modified data models and new user roles. The source and sink systems shall be determined through the development of the system context diagram and the web service requirements. The Reason for the Potential Scenario column will be to offer guidance regarding what potential Scenarios, and their context, may be needed for this project. This section applies to all policy development projects, market enhancements, technology enhancements, operation enhancements, Energy Imbalance Market (EIM) implementations and Reliability Coordination (RC) service implementations.

In the Reason for Potential Scenario column, the Business Analyst must select one or more of the following reasons:

1. **Rule Impacts:** Generalized changes in market rules, bidding rules, settlements rules, market design changes, or other business rules.
2. **Interface changes:** Changes that impact templates (e.g. the Resource Adequacy {RA} supply plan), user interface (UI), and application programming interface (API) (e.g. retrievals of new shadow settlement data).
3. **New application/report:** Changes that cause addition/modification of market software or reports, especially when market data input is required by the market participant.
4. **New system process:** Modification of data flow in systems, especially if the new process requires the market participant to demonstrate proficiency prior to production.
5. **New/Modified model data:** Addition or substantial modification of model data as a market solution provided by the ISO.
6. **New user role:** The addition or modification of access permissions for a user role applied to specific business units within an EIM entity or market participant organization (e.g. Load Serving Entity (LSE) as a Local Regulatory Authority (LRA) role). Scenarios are beneficial for market participants taking on a new function or process within their organization.

6 Appendices

6.1 Appendix 1 – Acronym Definition

Acronym	Definition
A2A	Application to Application
AF	Allocation Factor
Anode	Aggregate Node
API	Application Program Interface
APnode	Aggregate Price Node
B2B	Business to Business
BA	Business Analyst
BA	Balancing Authority
BAA	Balancing Authority Area
BOG	Board Of Governors
BPM	Business Process Manual
BRS	Business Requirement Specifications
CAISO	California Independent System Operator
CBT	Computer-Based Training
CEC	California Energy Commission
CIM	Common Information Model
CIP	Critical Infrastructure Protection
CLAP	Custom Load Aggregation Point
CLSE	<i>CRR participant which is Load Serving Entity</i>

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
CMRI	Customer Market Results Interface
Code	Connectivity Node
CPUC	California Public Utility Commission
CRR	Congestion Revenue Right
CRRH	Congestion Revenue Right Holder
CRRSU	Congestion Revenue Right Replacement project
CSS	Critical Systems Support
CSV	Comma Separated Values
CTS	Credit Tracking System
DA	Day-Ahead
DAM	Day-Ahead Market
DASR	Direct Access Service Request
DB	Data Base
DDS	Design & Development Specifications
DI	Develop Infrastructure
DIM	Data Input Model
DLAP	Default Load Aggregation Point
DM	Develop Markets
DMM	Department of Market Monitoring
DST	Daylight Saving Time

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
DUNS	Data Universal Numbering System
EAL	Estimated Aggregate Liability
EDR	Enterprise Data Repository
EIM	Energy Imbalance Market
EMM	Enterprise Modeling Management
EMMS	Enterprise Modeling Management System
EQ	Eligible Quantity
ERC	Equipment Rating Change
ESP	Electronic Security Perimeter
ETC	Existing Transmission Contracts
FERC	Federal Energy Regulatory Commission
FEQ	Final Eligible Quantity
FNM	Full Network Model
FODD	FERC Outgoing Data Depository
FR	Frequency Response
GCARM	Generator Contingency and RAS Modelling
GDF	Generation Distribution Factor
GFF	Generation Flow Factor
GIP	Generator Interconnection Procedure
GRDT	Generator Resource Data Template

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
GUI	Graphical User Interface
HF	Historical or Forecast
IAIQ	IT Architecture, Integration and QA
IBAA	Inter-Balancing Authority Area
IEC	International Electrotechnical Commission
IC	Injection Change
ID	Identification
IFM	Integrated Forward market
IS	Information Security
ISL	Intertie Scheduling Limit
ISO	California Independent System Operator
IT	Information Technology
ITC	Inter-Tie Constraint
ITPD	Information Technology Product Development
ITPM	Information Technology Product Management
kW	Kilo Watt
LAP	Load Aggregation Point
LDF	Load Distribution Factor
LM	Load Migration
LMP	Local Marginal Price

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
LMT	Load Migration Tool
LSE	Load Serving Entities
LT	Long Term
MCI	Model & Contract Implementation
MEQ	Monthly Eligible Quantity
MF	Master File
MHC	Manage Human Capabilities
MLAP	MSS Load Aggregation Point
MMG	Manage Markets & Grid
MMR	Manage Market & Reliability Data & Modeling
MOI	Market Operator Interface
MOS	Manage Operations Support & Settlements
MP	Market Participant
MPP	Market Participant Portal
MQRI	Market Quality and Renewable Integration
MQS	Market Quality System
MSG	Multi-Stage Generator
MSS	Metered Sub System
MT	Merchant Transmission
MUI	Market User Interface

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
MVA	Mega Volt Ampere
MVQ	Market Validation Quality
MVQA	Market Validation Quality & Analysis
N/A	Not Applicable
NGR	Non-Generating Resource
OASIS	Open Access Same-Time Information System
OBAALSE	Out-of-Balancing Authority Area Load Serving Entities
OES	Operations Engineering Services
OMS	Outage Management System
PA	Participant
PAID	Participant numeric ID
PCA	Price Correction Application
PDF	Portable Document Format
PDR	Proxy Demand Response
Pmax	Maximum Generation (Load) MW Level
PMB	Plan & Manage Business
Pmin	Minimum Generation (Load) MW Level (same as ML)
Pnode	Price Node
PNP	Priority Nomination Process
PSS/E	Power System Simulation for Engineering

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
PSTD	Power Systems Technology Development
PSTO	Power Systems Technology Operations
PTO	Participating Transmission Owner
QRB	Quality Review Board
RAR	Resource Adequacy Requirement
RAS	Remedial Action Scheme
RC	Reliability Coordinator
RDT	Resource Data Template
RES	Resource
REST	Representational State Transfer
RRDR	Reliability Resource Demand Response
RT	Real-Time
RTCA	Real-Time Contingency Analysis
RTM	Real-Time Market
RTN	Real-Time Market
RUC	Residual Unit Commitment
SADS	System And Design Specifications
SaMC	Settlements system
SaMP	Settlements Production system
SAMQ	Security, Architecture, Model management & Quality

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
SBS	Support Business Services
SC	Scheduling Coordinator
SCED	Security Constrained Economic Dispatch
SCS	Support Customers & Stakeholders
SCUC	Security Constrained Unit Commitment
SEQ	Seasonal Eligible Quantity
SF	Shift Factor
SFT	Simultaneous Feasibility Test
SFTP	Secure File Transfer Protocol
SIBR	Scheduling Infrastructure Business Rules
SLAP	Sub-Load Aggregation Point
SME	Subject Matter Expert
SOA	Simple Object Access
SOAP	Simple Object Access Protocol
SP	Scheduling Point
SQMD	Settlements Quality Meter Data
SRS	System Requirement Specifications
SRS	Secondary Registration System
SS	Source/Sink
STUC	Short-Term Unit Commitment

 California ISO	Technology	Template Version:	5.1
		Document Version:	1.3
CRR System Upgrade Business Requirements Specification - Planning		Date Created:	3/15/2023

Acronym	Definition
SUB	Sink Upper Bound
TAC	Transmission Access Charge
TH	Trading Hub
TBD	To Be Determined
TOR	Transmission Ownership Rights
TOU (tou)	Time Of Use
TRTC	Transmission Rights and Transmission Curtailment
UDC	Utility Distribution Company
UI	User Interface
WAC	Wheeling Access Charges
WebOMS	Web-based Outage Management System
WECC	Western Electricity Coordinating Council
WLS	Weighted Least Squares
XML	Load Aggregation Point
